PUBLIC NOTICE

The Tennessee Division of Air Pollution Control (TDAPC) has received requests for construction and/or modification of air contaminant sources as noted below. The proposed construction and/or modification is subject to part 1200-3-9-.01(1)(h) of the Tennessee Air Pollution Control Regulations, which requires a public notification and 30-day public comment period. Interested parties may express their comments and concerns in writing to Mrs. Michelle W. Owenby, Director, Division of Air Pollution Control, William R. Snodgrass Tennessee Tower, 312 Rosa L. Parks Avenue, 15th Floor, Nashville, Tennessee 37243 within thirty (30) days of the date of this notice. Questions concerning a source may be addressed to the assigned Division personnel at the same address or by calling 615-532-0554.Individuals with disabilities who wish to participate should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such participation. Such contact may be in person, by writing, telephone, or other means, and should be made no less than ten days prior to the end of the public comment period to allow time to provide such aid or services. Contact the Tennessee Department of Environment and Conservation ADA Coordinator, William R. Snodgrass Tennessee Tower, 312 Rosa L. Parks Avenue, 2nd Floor, Nashville, Tennessee 37243, 1-866-253-5827. Hearing impaired callers may use the Tennessee Relay Service, 1-(800)-848-0298. The applicant is Proton Power, Inc. with a mailing address of 397 Black Hollow Road, Rockwood, TN 37854. The facility seeks to obtain an air contaminant permit (73-1117/971829) for construction of a Research and Development, Synthetic Fuel Demonstration facility at 210 Sam Rayburn Parkway, Lenoir City, TN 37771. The proposed operation will consist of the following: Source 02: Synthetic Fuel Production (distillation drums, flares, wastewater), Source 03: Biomass Handling/Drying (crumbler, dryers), and Source 04: Process Water Handling/Wood Vinegar Production (oil/water separator). Flares will be used to control emissions from the Synthetic Fuel Production process. There will be physical construction with regulated air contaminants emitted by the source. Tawanna F. Reid is the assigned Division person.

Impact 2: Latitude 35.900718 Longitude -84.517961
An outfall replacement for a 42" reinforced concrete pipe including riprap outlet protection. More details on the proposal can be viewed on the Internet at https://www.tn.gov/environment/topic/ppo-water

WATERSHED/WATERBODY DESCRIPTION
The Watts Bar Watershed is located in East Tennessee and includes parts of Bledsoe, Cumberland, Loudon, Meigs, McMinn, Monroe, Rhea and Roane Counties. The Watts Bar/Fort Loudoun Watershed is approximately 1355 square miles. The Watts Bar portion is approximately 684 square miles. For more information on this watershed or any watershed in the state of Tennessee, please visit our TN Basins webpage.

ECOREGION
67(f) Southern Limestone/ Dolomite Valleys and Low Rolling Hills

STREAM NAME/ID TN06010208001 2000

The Watts Bar Reservoir is fully supporting its designated uses for fish and aquatic, municipal and industrial water supply, livestock and wild life watering, and irrigation. A water quality assessment from 2014 indicates that this body of water is not meeting its designated uses for recreation due to high levels of mercury, chlordane, and polychlorinated biphenyl. Sources for these contaminants include sediments and atmospheric deposition.

To view the proposed location of these impacts and the watershed condition visit: http://tdeconline.tn.gov/dwr/ and search on the permit number: NRS16.142

DETERMINATIONS
In accordance with the Tennessee Anti-degradation Statement (Rule 0400-40-03-.06), the Division has determined that the proposed activities will result in greater than de minimis degradation to water quality. This activity has been required by the Division to ensure the stability and integrity of TVA managed dikes along coal ash ponds to protect waters of the state and human health and safety. Therefore, no compensatory mitigation is required.
