Re: Compliance Evaluation Inspection
Abernathy Concrete Co., Inc.
NPDES Permit No. TNG110118
Pulaski, Giles County, Tennessee

Dear Mr. Abernathy:

On May 6, 2015, I conducted a Compliance Evaluation Inspection (CEI) at the Abernathy Concrete Co., Inc. facility in Pulaski, TN. A CEI is conducted to determine compliance with the requirements of the NPDES Ready Mix Concrete General Permit No. TNG110118. The following observations were made during the inspection.

1. The current permit became effective on March 8, 2013 and shall expire on October 31, 2017.

2. Wastewater generated from truck washoff area and stormwater flows to a series of filter berms in a rock lined ditch below the concrete batch plant. This process allows concrete fines and other material to settle out between each filter berm. It was observed during the inspection that accumulated solids need to be removed between the berms. There is also a substantial amount of weeds growing in and around the treatment area that need to be removed. No water was present in the rock lined ditch on the day of the inspection.

3. Waste concrete generated at the site is poured into forms to make bin blocks. These blocks are used on site to enclose the raw materials used in the concrete batching process. There is no off site waste disposal area associated with this facility.

4. A truck washout basin is located on site. This basin is cleaned out as needed and has a berm built around the perimeter. There is no discharge associated with this basin.

This concludes my observations. I would like to thank Mr. Hammonds for his time and cooperation during the inspection. If you have any questions you may reach me at 1-931-840-4166 or by e-mail at gary.horne@tn.gov.

Sincerely,

Gary Horne
